

FREE FACILITIES MANAGEMENT LUNCH

Cowley First and Mahaney Roofing teamed up in 2016 to bring resources and information to local businesses and front line workers that deal with facility management issues. The goal is to gather facility managers, maintenance techs, custodians, project managers and even the financial gurus of your business or organization to discuss and present information on how to plan and prepare for your facilities' future. Topics may range from certifications, training, facility planning and benchmarking.

We very much want your input so that we may respond to your needs and concerns as we invite quarterly presenters. We hope you can join is for our next FREE lunch.

JUNE 7TH-iSi ENVIRONMENTAL PRESENTATION

Environmental and Safety Regulations – What Applies to Me and How Do I Take Care of It All?

General industry facilities have a myriad of environmental and safety regulations they need to comply with from a variety of different regulatory agencies

In this presentation, iSi Environmental will cover the major categories of environmental and safety compliance your facility may encounter. They'll also discuss a services program they have developed which has helped small and mid-sized manufacturers manage all these obligations without hiring a team of full-time compliance professionals to their staffs.
